- File Importer and Data Connectors to SQL Data Sources
- Federated Search across multiple Data Sources
- Visual Query for External Data Sources
- Integral Database to Store and Share Data with Workgroup(s)

BLUE FUSION

FOR IBM® i2® ANALYST'S NOTEBOOK

Blue Fusion™ is the solution for Analyst's Notebook productivity. Blue Light LLC is an IBM® Premier Business Partner and has created the first turnkey analytical support solution for workgroups, based on i2® technology. Blue Fusion™ is customer installable software that can help a workgroup be up and running, in hours versus weeks. Blue Fusion™ can be connected to all the various data sources that your organization has available. This connection allows us to provide a single interface from which to search and analyze data. Utilizing a single interface allows for the combining of information from various sources to develop a comprehensive picture and begin the process of turning information into intelligence.

Blue Light is your preferred source for the entire i2 suite.

SUPPORT

- 24/7 Phone Support
- Secure Software Download Center

TRAINING

- i2 suite of products' training courses
- Self-paced, instructor-led, in-person classes throughout the world
